

Certified PowerTrain specializes in the manufacturing and engineering of mechanical and driveline components.

CPT provides unique customer driven solutions with an emphasis on engineering and quality.

PRODUCTS

DRIVESHAFTS

Allow our engineering applications group to provide custom driveshafts to meet the most challenging applications.

YOKES

We offer a wide variety of yoke types such as end yokes, slip yokes, flange yokes, brake yokes, weld yokes and yoke shafts.

FLANGES

We can design and manufacture flanges to your precise specifications for optimum driveshaft stability, guidance, and mounting ease.

SPROCKETS

Benefit from our highly automated manufacturing cells to provide the most competitive sprockets in the industry.

JOINTS

Wing bearing or round bearing, we leverage our technical expertise to offer joints with the best value to our customers.

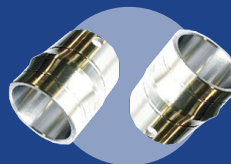

TRANSMISSION COMPONENTS

We manufacture custom transmission parts that have complicated oil passage and precision seal surfaces.

SPLINE STUBS, SPINDLES & AXELSHAFTS

With splining being one of our core competencies, we design and manufacture slip stubs, bearing stubs and longer shafts for various applications.

BEARING HOUSINGS

Manufactured using robotic cells to provide precision quality and competitive pricing.

MACHINING

- Turning
- Shaping
- Milling
- Broaching
- Hobbing
- Grinding

HEAT TREATING

- Carburizing
- Nitriding
- Normalizing
- Quench & Temper
- Induction Hardening

ASSEMBLY

- Pressing
- Welding
- Balancing
- Painting
- Straightening
- Leak/Pressure Testing

VALUE ADDED SERVICES

- Supply Chain Management
- Warehousing
- Laser Marking
- Engineering
- Metallurgical Analysis

COMPANY OVERVIEW

Empowering Our Customers with the Power to Move Forward

Certified PowerTrain specializes in drivetrain assemblies and precision-machined components, serving diverse industries while providing complete solutions for our customers. What sets us apart is our end-to-end approach – we manage the entire value chain, from sourcing raw materials to delivering the finished product. Our exceptional Customer Service and Engineering expertise make us a trusted partner to some of the world’s largest companies.

Engineering & Manufacturing custom solutions and complex precision mechanical parts, including powertrain components. Whether low, medium or high volumes, we have the process to meet your needs.

Capabilities that make us a full-service component supplier to our OEM customers. CPT offers a full spectrum of services ranging from engineering and prototype development to raw material procurement and warehousing to custom manufacturing and testing services.

Quality backed up by our certifications: ISO 9001, Cpk studies, Gage R&R studies, DFMEA’s, PFMEA’s, PPAP’s, and more.
